

ANDREW STRUCTURAL SUPPORT CUSTOMIZATION SERVICES DELIVER RAPID RESULTS

Agility is critical in the mobile marketplace. But your customers all have specific needs, and one size definitely does not fit all. If your deployment requires customer-specific or even site-specific structural support products, our ANDREW customized service can build them for you—fast.

Support solutions built just for your customers

ANDREW provides structural support solutions that deliver stability, durability and precision for the most important networks in the world. Our premium structural support solutions reinforce your structure and optimize antenna performance, to enable you to unlock significant long-term OpEx savings. ANDREW customized service is the smarter, faster way to deploy structural support solutions that truly meet customer needs.

Maximize agility and customer value

Your customers want solutions built to order, and they want them now. ANDREW helps you deliver them with our customized service.

- Need a modification to an existing ANDREW product? We can work with you to understand exactly what's needed and develop a variant tailored to your needs.
- If you're facing mechanical issues for a build, we can create a custom version that best fits your technical requirements.
- If you're considering a competitive product that's not available from ANDREW, our engineers can develop an equivalent solution built to your specs.

Get out in front of competitors, seize more opportunities, and deliver better value to customers with ANDREW customized service. Contact us by emailing steelproducts@andrew.com to get the conversation started and see how we can help you with your project.
